Alternative Methods of Instruction

Name: _____ Date: _____

3rd Grade AMI #3

Your child will have 5 days to complete and return this to his/her teacher to get credit for the day. If you need more time, please let the teacher know.

Hoodoos Made of Rock

Have you heard of a hoodoo? A hoodoo is a special shape made of rock. It is a tall column!

There is a place in Utah that is filled with these special rocks. It is called Bryce Canyon. It has more hoodoos than any other place in the world! The rocky hoodoos there are colorful. They are pink, orange, and red.

These hoodoos formed over a long time. Water and ice shaped the rocky land into columns. The columns are different heights. Some are the size of a person. Some are more than 100 feet tall!
