

TRANSPORTATION OF THE WORLD

**BY: Benjami, Erik, Chayse,
Graham**

The Kiowa

- **The Kiowa moved with the buffalo herd**
- **They hunted buffalo and used the skin for clothing**

The Bedouins

- **The Bedouins traveled with sheep, goat or camels.**
- **They traveled between water holes and grazing plains.**

The Indians

- The Indians traveled by horses and in tribes.
- They killed and ate animals .
- They used animal skins for blankets and clothes.

Sailing Ships

- *Hardly anybody rode by ship.*
- *The trips by ship cost too much money and often took too long.*

Trains

- The steam-engine train was invented in England around 1800.
- Trains made distances appear to shrink because they could travel at high speeds and cover a lot of ground.

CARS

- The Model T Ford was the first affordable car
- The Model T Ford was invented by Henry Ford
- Solar power cars run on the sun
- Electric cars can be plugged in and save energy

PLANES

- The first plane was invented by the Wright brothers.
- The Concorde (stopped making in 2003) it went twice the speed of sound (or 1,367 mph).

Mobile homes

- You can move them because they are small
- They are cheap because they are small

Motorized scooter

- *A motorized scooter is the size a pedestrian.*
- *The scooter is primarily in a standing position with a small motor attached.*
- *It can go 12 miles an hour at top speed.*

Future transportation

- Flying cars—we will get to see airplanes from the outside
- Hover board—we will be able to get to school faster
- Teleportation machines—we will be able to get to places in a blink
