Name: _____ Date: _____

4th Grade AMI Work #3

Your child will have 5 days to complete and return this to his/her teacher to get credit for the day. If you need more time, please let the teacher know.

A Wind and Rain Bridge

Have you heard of a wind and rain bridge?

This kind of bridge can be found in China. These bridges are meant to protect people from wind and rain. So they have a roof. They also have structures called pavilions. People can meet or rest inside them.

One famous wind and rain bridge is the Chengyang Bridge¹. It is very grand. It has five pavilions!

This bridge is also special because of how it was made. It was made mostly from wood long ago. But the builders did not use any nails to hold it together! They cut the wood to make it fit together. And the bridge still stands strong today!
